*Liquid Fertilizer*

# POTATOES

## *The Proof Is In The Harvest*

### Fast Acting

The 11.6% nitrate nitrogen in Nutrien CAN17 provides quick uptake and improved plant response, while the 5.4% ammoniac nitrogen gives sustained plant feeding. Meets the nitrogen requirements for potatoes during key growth periods. The ability to water run also allows for effective nitrogen management.

### Nitrogen During Critical Periods

Readily available nitrate nitrogen in Nutrien CAN17 allows you to apply it during the critical periods of development.

### Increases Water Penetration

The 8.8% soluble calcium in Nutrien CAN17 improves water penetration allowing available nitrogen and moisture to move easily into the root zone. Solidifying proper cell division, cell wall strength, and fewer tuber disorders

### Improved Storability

The calcium in Nutrien CAN17 helps improve storage life.

### Easy To Apply

Nutrien CAN17 can be sprayed on the soil surface, injected in the soil, applied through sprinkler, mister, drip or surface water irrigation systems.

### Won't Plug Systems

Nutrien CAN17 is a clear, stable liquid not a mix of dry calcium nitrate and other nitrogen solutions, which can plug sprinkler systems and sprayers.

### No Other Liquid Comes Close
