STRAWBERRIES

The Proof Is In The Harvest

Fast Acting

The 11.6% nitrate nitrogen in Nutrien CAN17 provides quick uptake and improved plant response while the 5.4% ammoniac nitrogen gives sustained plant feeding. Gives strawberries the necessary balance between nitrate nitrogen and ammoniac nitrogen. The ability to be applied through drip irrigation systems also give more nitrogen control.

Nitrogen During Critical Periods

The readily available nitrate nitrogen in Nutrien CAN17 allows you to apply it during the critical periods of development resulting in improved fruit.

Increases Water Penetration

The 8.8% soluble calcium in Nutrien CAN17 aids in producing firm berries with a good shelf life and improved disease resistance.

Easy To Apply

The nitrate nitrogen in Nutrien CAN17 can be sprayed on the soil surface, injected into the soil, applied through sprinkler or surface water irrigation systems.

Won't Plug Systems

Nutrien CAN17 is a clear, stable liquid not a mix of dry calcium nitrate and other nitrogen solutions, which can plug sprinkler systems and sprayers.

No Other Liquid Comes Close
